PROFESSIONAL SUMMARY

Full Stack Developer with 1+ year of hands-on experience building cross-platform mobile and web applications using React Native and React.js, with backend development in Node.js (Express) and Spring Boot. Experienced in designing and optimizing RESTful APIs, achieving up to 30% reduction in response time, and working with MySQL and MongoDB for efficient data management.

Skilled in implementing authentication systems (JWT and session-based), developing reusable UI components, and improving application performance through debugging and optimization techniques. Brings 3 years of prior experience in technical recruiting, with a strong understanding of software roles and industry hiring requirements.

TECHNICAL SKILLS

Languages: JavaScript, SQL

Frontend Technologies: React.js, React Native, HTML, CSS, Responsive Design

Backend Technologies: Node.js (Express), Spring Boot, REST API Development

Databases: MySQL, MongoDB

Tools & Platforms: Git, GitHub, VS Code, Postman

Core Competencies: Full-Stack Development (React, Node.js), Mobile App Development, State Management (Redux/Context API), Authentication & Authorization, Debugging & Testing, Performance Optimization (basic)

PROFESSIONAL EXPERIENCE

Full Stack Developer

Cye Technologies Pvt. Ltd.

January 2025 – Present

Hyderabad, Telangana, India

- Developed cross-platform mobile applications using React Native and web applications using React.js, improving user engagement and performance
- Built and optimized RESTful APIs using Node.js (Express) and Spring Boot, reducing average response time by 30%
- Designed reusable UI components and responsive interfaces using React.js, HTML5, CSS3, and JavaScript, accelerating feature delivery
- Engineered and managed MySQL and MongoDB databases, improving query performance and ensuring data consistency
- Implemented authentication systems (JWT/session-based) and state management solutions for scalable application architecture
- Reduced application load time and improved runtime performance through debugging, profiling, and optimization techniques
- Collaborated with cross-functional teams using Git/GitHub, ensuring clean code practices and efficient version control workflows
- Contributed to full-stack development of client-facing applications, enhancing usability and system reliability
- Continuously learned and adopted modern frameworks, tools, and industry best practices in mobile and web development

Technical Recruiter

Various Clients/Projects

January 2022 – December 2024

Hyderabad, Telangana, India

- Managed end-to-end recruitment for technical roles, successfully placing candidates in JavaScript, React, and backend positions.
- Partnered with hiring managers to define role requirements, assess team fit, and streamline hiring workflows, reducing time-to-hire.
- Screened and shortlisted candidates through resume review, interviews, and technical assessments, ensuring high-quality talent acquisition.
- Built and maintained pipelines of pre-qualified candidates, improving hiring efficiency and supporting multiple ongoing projects.

KEY PROJECTS

Campus1 — Institutional Campus Management Platform <i>Full Stack Web Application</i>	React.js, Node.js (Express), MySQL
- Designed and developed a full-stack campus management system handling 500+ student records and academic workflows - Implemented secure authentication and role-based access control for Admin, Faculty, and Student users to ensure data security - Built dynamic dashboards with role-based conditional rendering, reducing manual data access time by 30% - Developed RESTful APIs using Node.js (Express) to manage student records, attendance, and academic data with optimized response handling - Structured and managed MySQL database with optimized queries, improving data retrieval efficiency by 25% - Developed responsive and reusable UI components using React.js to enhance user interaction and navigation consistency	
Home Service Application <i>Full Stack Mobile Application</i>	React Native, Node.js, MySQL
- Built a cross-platform mobile application supporting 100+ users for booking and scheduling home services - Developed RESTful APIs using Node.js for user authentication, service listings, and booking workflows, ensuring smooth data flow - Implemented booking and scheduling system with real-time updates, reducing booking conflicts and delays - Integrated secure payment gateway to enable reliable in-app transactions and improve user trust - Designed intuitive and responsive mobile UI using React Native to enhance user engagement and navigation	
University Application <i>Full Stack Mobile Application</i>	React Native, Node.js, MySQL
- Contributed to the development of a university management system managing 300+ student and course records - Developed frontend modules for course registration and grade management using React.js to improve usability - Integrated frontend components with backend APIs to ensure seamless data flow and reliable system performance - Implemented authentication and role-based access control to enhance system security and access management	

EDUCATION

Bachelor of Technology in Electronics and Communication Engineering <i>S.R.T.I.S.T (JNTUH) — 62%</i>	2017 – 2021 <i>Nalgonda, Telangana, India</i>
Intermediate (MPC) <i>Vinoothana Junior College — 60%</i>	2014 – 2016 <i>Telangana, India</i>
SSC <i>Ekalavya Foundation School — CGPA: 5.3</i>	2014 <i>Telangana, India</i>

ADDITIONAL INFORMATION

Languages: English, Hindi, Telugu Strengths: Team Collaboration, Client Communication, Problem Solving
